Subject: RE: TSLIS - > Production

Hi All,

I checked with the STD area. They were using the wrong shortcut..... Rozelta is working her way through the clerks and told Bill Dumas that he is responsible for the STD control areas.

I also checked and IIS2 is disabled and does not allow user access. This is the error that the clerks were receiving.....

Thanks for checking....

Dina,

I checked the connection string and ODBC, both points to production server.

Dy,

Can we stop the IIS on DPH-SLI-IIS2? If someone goes to slis-web-1 the website will fail so that we can fix their url to tslis-web-1.

By keeping the server active we can compare the folder rights and permission incase if we need to check on IIS2 server.

Thanks,
PRABHU

Hi Prabhu,

Guna is out sick today, so I need your help. Janice Zanolli (Lab Clerk) told me that only Charlene Phillips has access to TSLIS. Can you check the SQL rights and make sure that the rights were copied from SLIS to TSLIS correctly?

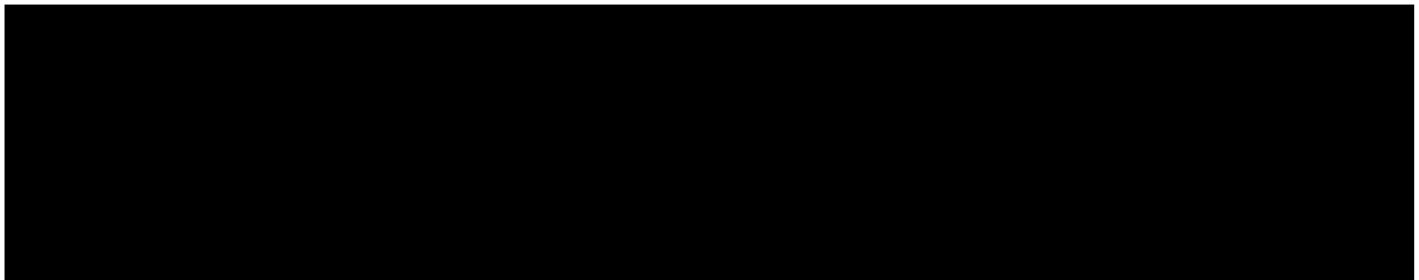

Also...**Dy**, can you please confirm that all the NT authentication rights were also copied?

Thanks...Dina

Following changes were done in TSLIS-WEB-1 Server.

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.

Thanks
Guna

Everything looks fine except for item 2 to comment one line of code.

When we use training server, we do not want to print labels during order entry. include\SLISConn.asp has code that checks for the ip address and will disable printing labels during Order entry if it's training server. Make sure to comment this line of code so that printing labels works fine.

Just to be sure with the changes double check the following:

- 1) SLISConn.asp has DB reference to production db server.

- 2) SLISConn.asp has BD and KC4 references to the same server to read files by the application .Currently this will have ip address pointing to production server 146.243.108.62 (not sure if the ip is right :).
- 3) Work with the lab to see if the first uploads from BD and KC4 gets to training server after the move.
- 4) Check the report url on home page and home page link on the report page takes to TSLIS-WEB-1 (just to be sure with the recent changes that were made)

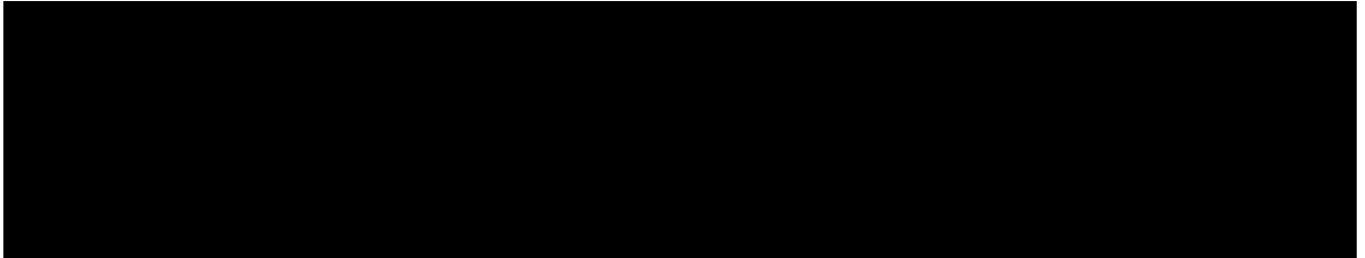

As far I can think, everything is covered and should be fine.

Hi Prabhu,

These are the following details which we discussed to convert TSLIS-WEB-1 as a production server between 11.30 to 2.00 pm today. Also in case if IIS2 need to destroyed and re-built, TSLIS-WEB-1 should take run as a production until we get IIS2 back.

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.

If I am missing anything pls do let me know.

Regards,
Guna Pandian
